

BUILD BACK BETTER

Framework, Tool and Indicators

By understanding the concept behind the term "Building Back Better" we have developed a framework to define and implement post-disaster reconstruction and recovery practices.

THE FRAMEWORK

The framework guides the user through the key features of Disaster Risk reduction, Community Recovery, and Effective Implementation during reconstruction and recovery practices.

THE TOOL

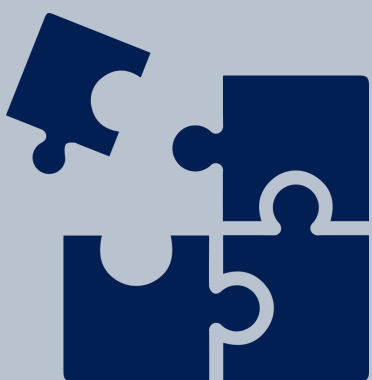

The tool allows the user to assess and plan their recovery efforts to provide resilient outcomes to people, places and spaces.

THE INDICATORS

Each key features has a set of indicators which serve as practical recommendations for implementation.

FEATURES

- Straight forward assessment.
- Rates recovery efforts using best practice.
- Applied to any organisation involved in post-disaster recovery.
- Help you plan recovery efforts.
- Non-prescriptive.
- Can be customised to local environments.
